

Niraj Mourya

FULL STACK WEB DEVELOPER

Profile

Full Stack Software Engineer with 6.5+ years of experience, currently working at CitiusTech, building high-quality web applications using the MERN stack. Strong expertise in React for front-end development and Node.js for backend services, with hands-on experience designing RESTful APIs and working with SQL databases. Proven ability to own features end-to-end, from requirement analysis and development to optimization and production support. Adept at writing clean, maintainable code and collaborating in product-driven teams.

Employment History

Technical Lead – I (Senior Individual Contributor), CitiusTech, Pune

DEC 2024 – PRESENT

Projects:

eLearning Platform for Medical Professionals:

- Contribute to the development of a production-grade eLearning platform used by medical professionals, working in a Scrum-based Agile SDLC with bi-weekly releases.
- Design and develop RESTful APIs using Node.js, following clean architecture and best practices.
- Design, create, and modify SQL databases and tables using Sequelize ORM, ensuring data integrity and performance.
- Build pixel-perfect, responsive UIs in React by accurately translating Figma designs into reusable components.
- Implement business logic, features, and user interactions on top of UI components to deliver complete, functional experiences.
- Collaborated closely with product managers, designers, and QA to deliver features on schedule
- Actively participated in code reviews and bug fixes, reducing post-release defects by ~20% and improving overall code quality.

Key Achievement:

- Recognized with the Impact Award (Q4 2025) for consistently demonstrating ownership, accountability, and delivery excellence.

Programmer Analyst, Bitwise Solutions Pvt. Ltd., Pune

JUN 2019 – NOV 2024

Projects:

Sales Projection Portal:

- Developed a portal for the US Sales department to forecast revenue for the next 12 months, offering management valuable insights into the organization's income.
- The portal was built in SharePoint 2019 using JavaScript, jQuery, jqGrid, HTML, and CSS.

Details

102, Hari Krupa Apartment,
Haria Park
Vapi, Gujarat

Hobbies

Listening to Podcasts,
Reading Books,
Basketball, Cricket

HR Portal:

- Developed an HR portal supporting employee on boarding, exit processes, and performance appraisals, used by both HR teams and employees.
- Rebuilt the UI using React, Redux, and Bootstrap, significantly improving performance and user experience over the earlier vanilla JavaScript implementation.
- Implemented Azure AD authentication (MSAL) and developed RESTful APIs for CRUD operations on an MS SQL database.

Laptop Issuance Automation:

- Automated the manual process of Laptop Issuance and its document creation for the Stores department in SharePoint 2019 by using C#, HTML, CSS, and JavaScript, jQuery, jqGrid and reduced the efforts by 70%
- Developed console application for Reminder/Notifications in C#
- Developed workflows automating several processes and tasks by using SharePoint Designer 2010 workflow and C# in Visual Studio

Equipment Maintenance Tracking:

- Developed and supported an application for the Facility department in SharePoint 2019 using jQuery, jqGrid, JavaScript for tracking and planning maintenance of 500+ equipment
- Developed Event Receiver using C# for track changes in record

Key Achievement:

- Received 'Excellence Award for Passion, Collaboration & Customer Service' in Quarter 1, 2021

Education

B.E (IT), D. Y. Patil College of Engineering, Pune University, Pune

JUL 2015 – MAY 2019

Academic Project:

- Android application to support small-scale Industries and Individuals to help them sell food articles, paintings, etc. online and expand their market.

Tech Stack: Java, Firebase, Android Studio

- Airline management system – using this application customer can book tickets and can see available flights between different cities. Admin can add, change, delete information of flight, fleet, and that of customer as well.

Tech Stack: Java, MySQL, XAMPP, NetBeans IDE

Personal Projects

BiblioBazaar

- Built and deployed a C2C e-commerce platform enabling users to rent books, handling frontend, backend, authentication, and payments end-to-end.
- Tech Stack: React JS, Redux, Material UI, Node JS, Express JS, MongoDB, Razor Pay, JWT, Google Books API, imagekit.io, Netlify, Render
