

Niraj Mourya

Full Stack Developer

Lead Engineer - I / Full Stack Engineer with 7+ years of experience building scalable web applications using React.js, Node.js, JavaScript, and SQL technologies. Skilled in designing RESTful APIs, developing responsive user interfaces, and delivering end-to-end features in Agile and Scrum environments. Proven ability to own feature development, collaborate with cross-functional teams, and drive high-quality software delivery through code reviews and engineering best practices. Experienced in mentoring junior developers, providing technical guidance, and conducting research spikes to evaluate solutions and drive informed technical decisions. Passionate about building robust, maintainable, and user-centric applications while fostering collaboration and engineering excellence.

Skills

JavaScript (ES6+)	ReactJS	Redux	Node.JS	TypeScript	ExpressJS
MySQL	MongoDB	Jest	HTML5	CSS3	SASS
RESTful APIs	Git	Github Copilot	Claude	AI-Assisted Development	Agile Scrum

Experience

CitiusTech (Pune) Dec 2024 - Present

Lead Engineer - I

Projects:

eLearning Platform for Medical Professionals

- Contributed to the development of a production-grade eLearning platform used by medical professionals, working in a Scrum-based Agile SDLC with bi-weekly releases.
- Designed and developed 25+ RESTful APIs using Node.js and Express.js, adhering to clean architecture principles and best practices.
- Designed, created, and maintained SQL database schemas and tables using Sequelize ORM, ensuring data integrity and optimal performance.
- Developed 15+ React components by translating Figma designs into maintainable and responsive user interfaces.
- Implemented business logic, features, and user interactions to deliver complete, user-centric experiences.
- Collaborated closely with product managers, designers, and QA engineers to deliver features on schedule.
- Actively participated in code reviews and bug fixes, reducing post-release defects by approximately 20% and improving overall code quality.
- Leveraged GitHub Copilot and Claude to accelerate feature development, debugging, refactoring, and documentation.
- Applied AI-assisted workflows for code generation, unit test creation, and problem-solving, improving developer productivity.
- Utilized Generative AI and LLM-powered tools for architectural brainstorming, root cause analysis, and technical research.

Bitwise (Pune) Jun 2019 - Nov 2024

Programmer Analyst

Projects:

Sales Projection Portal

.

Developed a portal for the US Sales department to forecast revenue for the next 12 months, providing management with valuable insights into the organization's projected income.

- Built the portal using SharePoint 2019, JavaScript, jQuery, jqGrid, HTML, and CSS.

HR Portal

- Developed an HR portal supporting employee onboarding, exit processes, and performance appraisals, used by both HR teams and employees.
- Rebuilt the user interface using React, Redux, and Bootstrap, significantly improving performance and user experience compared to the earlier vanilla JavaScript implementation.
- Implemented Azure AD authentication using MSAL and developed RESTful APIs for CRUD operations on an MS SQL database.

Laptop Issuance Automation

- Automated the manual laptop issuance process and document generation for the Stores department using SharePoint 2019, reducing manual effort by approximately 70%.
- Developed console applications in C# to send reminders and notifications.
- Developed workflows to automate various business processes and tasks using SharePoint Designer 2010 and C# in Visual Studio.

Equipment Maintenance Tracking

- Developed and supported an application for the Facility department using SharePoint 2019, JavaScript, jQuery, and jqGrid to track and plan maintenance activities for over 500 pieces of equipment.
- Developed Event Receivers in C# to track changes in records and automate related processes.

Personal Projects

BiblioBazaar

- Built and deployed a C2C e-commerce platform that enables users to rent and lend books, independently handling end-to-end development, including frontend, backend, authentication, and payment integration.
- Implemented secure JWT-based authentication, book listing and search functionalities, payment processing via Razorpay, and third-party API integrations.
- **Tech Stack:** React.js, Redux, Material UI, Node.js, Express.js, MongoDB, Razorpay, JWT, Google Books API, ImageKit.io, Netlify, Render

Awards

Impact Award (Q4, 2025)

CitiusTech

Recognized for consistently demonstrating ownership, accountability, and delivery excellence.

Excellence Award (Q1, 2021)

Bitwise

Received Excellence Award for Passion, Collaboration & Customer Service

Education

B. E. (Information Technology)

Jul 2015 – May 2019

D. Y. Patil College of Engineering (Pune)
